

## Student Adobe Connect Web Conferencing Instructions

To access a class Adobe Connect meeting you will need to be provided a link by your instructor. If your class is using D2L the link will usually be some where on the announcements section. Here is an example of my class links from my CST1511 class:

We will be using Adobe Connect for our meetings, go through the audio setup wizard, make sure to click on the microphone to connect to the audio portion of the meeting.

Jeff Polman Adobe meeting link

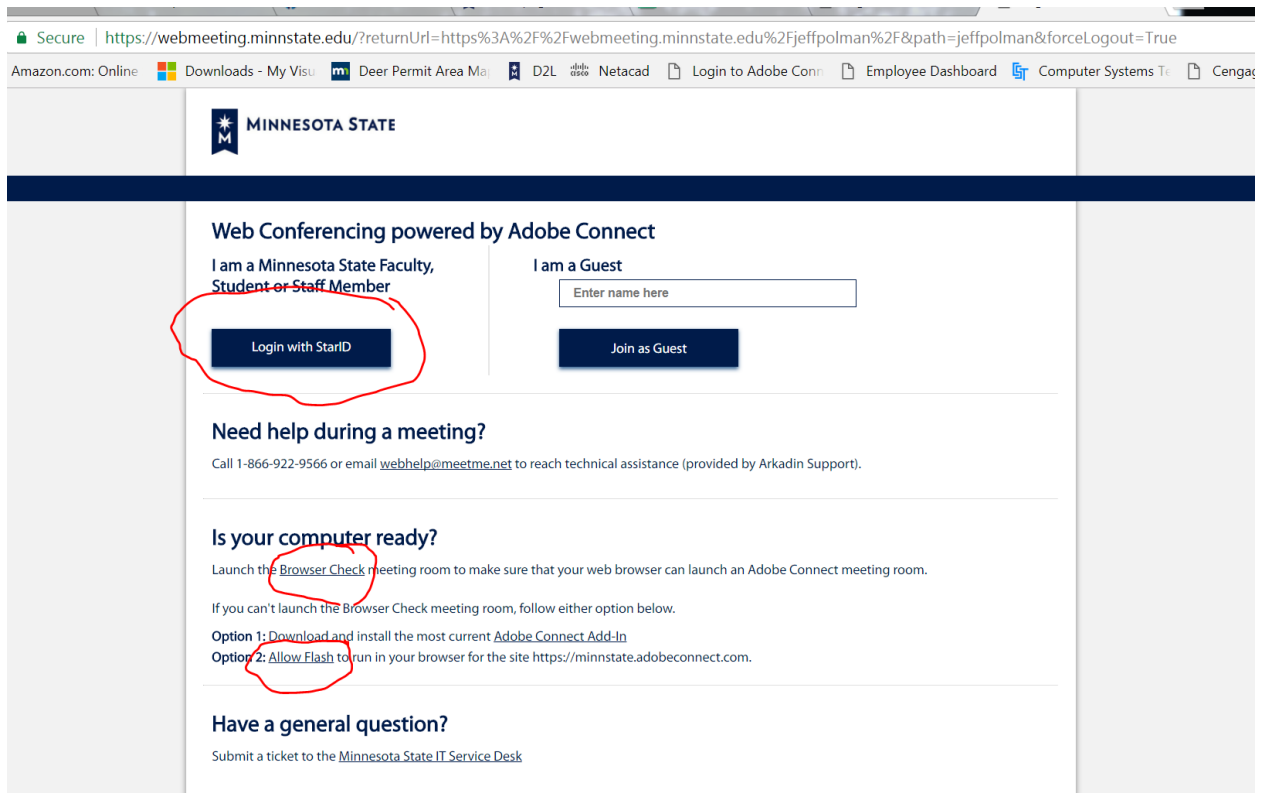

(<https://webmeeting.minnstate.edu/jeffpolman/>)

Thanks!

Jeff

All of the CST instructors use <https://webmeeting.minnstate.edu/teacher'sname>

When you click on that link you will get directed to a web browser that looks like this:

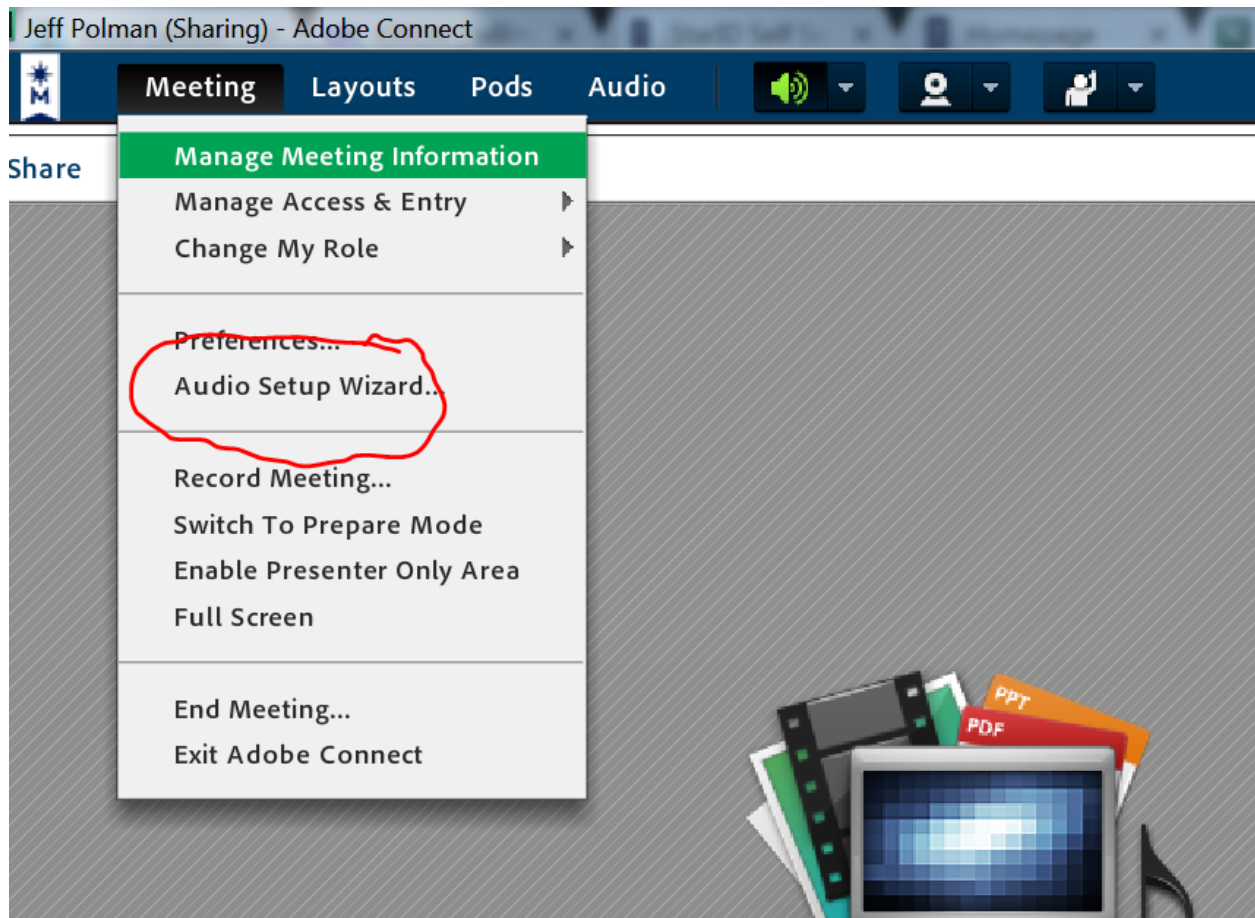

You need to login using your school star id information. This was given to you at your OAR session. If you do not know it click on this link:

<https://starid.minnstate.edu/>

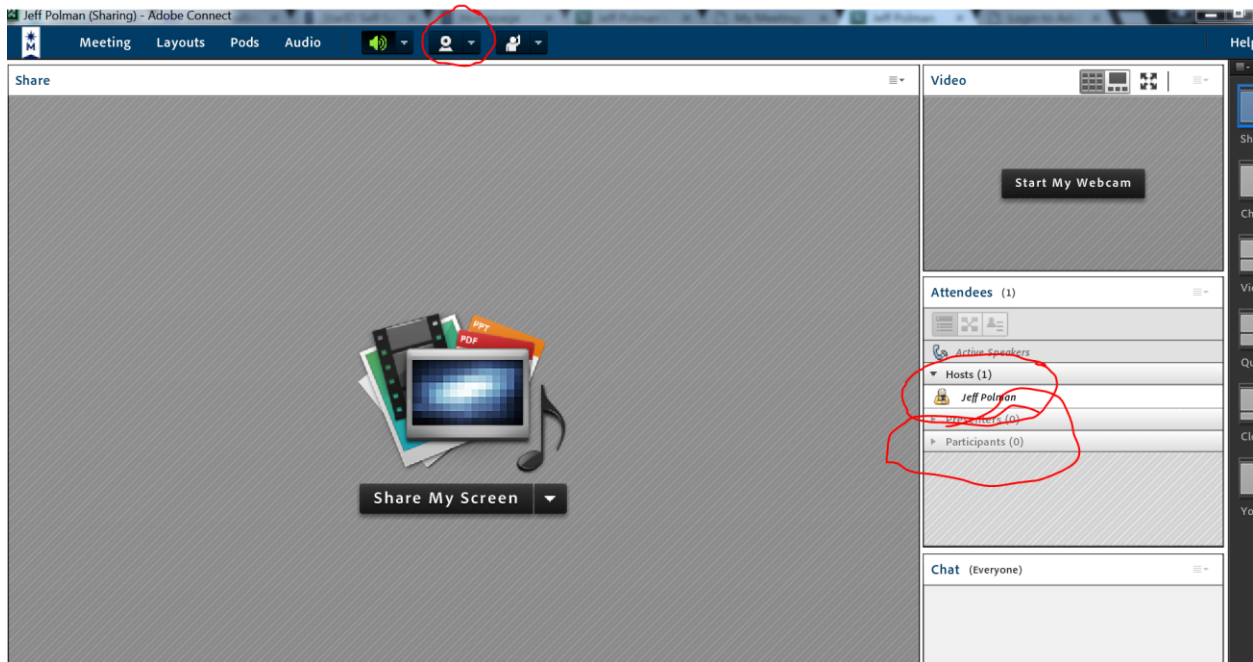

Be sure to allow flash, and also perform the browser check before logging in.

You will need to bring to school a headset with your laptop, as having multiple users in one room without laptops is very disturbing to other students.

Make sure to go through the Audio setup wizard under the meeting tab.

When you are done with that make sure to click the MIC tab to connect to the audio portion of the meeting:

Notice on the right you will see the host and other participants. You can chat with any of the people or all people in the meeting. The instructor will start the meeting and share his screen when the class is started.

You should be all set. If you are in the classroom you can click on the mic to mute your microphone or unmute it to ask questions, or respond to the instructor.
